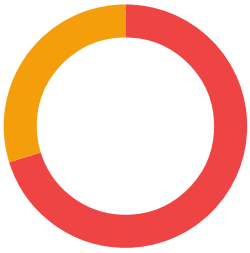
## AI Analysis Summary

### Full-Site AI Analysis

✦ Odito AI Insight

Overall site health is very poor with a score of undefined/100. AI visibility is significantly below average at 29/100 (Very Poor). Key gaps include structured schema implementation and entity coverage. Site shows strong technical foundation with minimal issues. Performance optimization should be prioritized to enhance user experience and rankings.

## Issue Distribution



- Critical (515)
- Medium (220)
- Info (0)

03

## Key Strengths vs Issues

What's working and what needs fixing

The Odito AI engine evaluated all SEO and AI visibility signals. Here is a summary of the site's strongest points and most critical areas for improvement.

### ✓ Key Strengths

- ✓ Valid SSL — HTTPS enforced site-wide via 301
- ✓ XML Sitemap with 298 URLs correctly declared
- ✓ Mobile-responsive with proper viewport configuration
- ✓ Clean URL architecture and logical hierarchy
- ✓ Core landing pages correctly indexed by Google

### ✗ Issues to Address

- ✗ 47 pages missing JSON-LD structured data markup
- ✗ Knowledge Graph entity not claimed or verified
- ✗ Mobile LCP 3.2s exceeds Google's 2.5s Good threshold
- ✗ 31 images missing ALT text — accessibility & SEO risk
- ✗ 5 key revenue pages blocked by noindex tags

**Priority Assessment** ✦ Odito AI Insight

Odito AI identifies the noindex issue on 5 revenue pages as the fastest win — a 30-minute fix restoring Google ranking access. Missing schema on 47 pages is the most impactful structural improvement, delivering +15 AI Visibility points once implemented.

04

## Priority Fix Roadmap

Action plan ordered by impact and effort

Execute items in order for maximum cumulative score improvement. Easy items take hours; Hard items may need a developer.

| # | Issue | Impact | Effort | Est. Gain | Timeline |
|---|---|---|---|---|---|
| 1 | Remove noindex from 5 key pages | High | Easy | +8 pts | Day 1 |
| 2 | Add FAQ schema to top 10 blog posts | High | Easy | +6 pts | Day 1-2 |
| 3 | Fix 14 broken internal links | Medium | Easy | +4 pts | Day 1-2 |
| 4 | Add Article/WebPage schema to 47 pages | High | Medium | +15 pts | Day 3-7 |
| 5 | Rewrite 10 page intros for GEO | Medium | Medium | +5 pts | Day 7-14 |
| 6 | Fix 18 missing meta descriptions | Medium | Easy | +4 pts | Day 7-10 |
| 7 | Add ALT text to 31 images | Low | Easy | +2 pts | Day 7-10 |
| 8 | Claim Knowledge Graph entity | High | Hard | +8 pts | Day 14-21 |
| 9 | Optimise mobile LCP to under 2.5s | High | Hard | +10 pts | Day 14-30 |
| 10 | Create E-E-A-T and GEO hub pages | Medium | Hard | +5 pts | Day 21-30 |

### Roadmap Impact Forecast

✦ Odito AI Insight

Following this roadmap is projected to lift overall score 58→82, SEO 67→84, and AI Visibility 41→68 within 30 days. Items 1-3 take under half a day and deliver +18 points.

05

# SEO Health Overview

Score breakdown by category

48

## Score Breakdown by Category

## Score Grade Reference

| Range | Grade | Status | What it means |
|---|---|---|---|
| 90-100 | A+ | Excellent | Top percentile — elite signals across all categories |
| 80-89 | A | Very Good | Minor improvements reach the elite tier |
| 70-79 | B | Good | Solid base — focused fixes move the needle |
| 60-69 | C+ | Fair | Prioritised action plan recommended |
| 50-59 | C | Average | Structured improvement plan needed |
| 0-49 | D | Poor | Significant issues across multiple dimensions |

**Score Interpretation**

✦ Odito AI Insight

wowinfotech.com scores D (48/100). SEO Health at 53 shows room for improvement. AI Visibility at 29 is critically low — and the fastest to fix.

SECTION 02

# SEO Audit

On-page, schema, technical and crawlability

02

06

# On-Page SEO Audit

735 issues across 25 pages

| 735 | 515 | 220 | 0 |
|---|---|---|---|
| All Issues | High | Medium | Low+Info |
| Total issues found | Fix within 7 days | Fix in 30 days | Opportunities |

## Issue Breakdown

| # | Issue | Severity | Pages | Count | Recommended Fix |
|---|---|---|---|---|---|
| 1 | **19 below-fold image(s) missing lazy loading** | HIGH | 25 | 25 | Address within 7 days - high priority for SEO improvement |
| 2 | **7 render-blocking resources detected** | HIGH | 25 | 25 | Address within 7 days - high priority for SEO improvement |
| 3 | **6 accessibility violations found: 6 unique types (3 serious, 3 moderate)** | HIGH | 25 | 25 | Address within 7 days - high priority for SEO improvement |
| 4 | **Social sharing not fully optimized — missing: og:title, og:description, og:image, twitter:card** | HIGH | 25 | 25 | Address within 7 days - high priority for SEO improvement |
| 5 | **5 image(s) missing width/height** | HIGH | 25 | 25 | Address within 7 days - high priority for SEO improvement |
| 6 | **4 duplicate image URL(s) on page** | MEDIUM | 25 | 25 | Plan to fix within 30 days - moderate SEO impact |
| 7 | **Apple touch icon is missing** | MEDIUM | 25 | 25 | Plan to fix within 30 days - moderate SEO impact |
| 8 | **H4 length is 3 chars (6–60)** | MEDIUM | 25 | 25 | Plan to fix within 30 days - moderate SEO impact |

### On-Page Priority Recommendation

✦ Odito AI Insight

Prioritize fixing "19 below-fold image(s) missing lazy loading" which affects 25 pages with 25 total occurrences. This issue has the highest impact on your SEO performance and should be addressed first for maximum improvement.

07

# Structured Data Analysis

JSON-LD coverage and AI search impact

| 19 | 6 | 76% | 36 |
|---|---|---|---|
| **With Schema** | **Missing Schema** | **Coverage** | **Errors** |
| JSON-LD detected | No structured data | of all pages | Validation issues |

## Schema Coverage Breakdown

- 19 pages with schema (76%)
- 6 pages missing schema (24%)

**Detected types:**

## Why Structured Data Matters

| Platform | With Schema | Without Schema | Your Gap |
|---|---|---|---|
| **Google Rich Results** | Eligible for rich results | Plain blue link only | Missing |
| **Google AI Overviews** | Entities extracted & cited | Anonymous — skipped | Critical |
| **ChatGPT / Perplexity** | High citation probability | Low citation probability | 12% vs 43% |
| **LLM Training Index** | Structured facts indexed | Unstructured — low priority | Impact |

### Structured Data Impact

✦ Odito AI Insight

JSON-LD is the primary mechanism AI search engines use to understand content. Adding schema to 6 pages is the fastest path to lifting LLM citation rate from 12% to 28-35%.

08

# Technical SEO Health

Server, crawlability and indexation audit

70

| 7 | 2 | 1 | 70% |
|---|---|---|---|
| Passed | Warnings | Failed | Tech Health |
| of 10 checks | Need attention | Urgent fixes | Overall |

## Technical Check Results

| Technical Check | Status | Finding / Detail |
|---|---|---|
| SSL Certificate | ✓ PASS | SSL certificate is valid and properly configured |
| Security Headers | ✗ FAIL | 25 pages missing critical security headers |
| Canonical Tags | ✓ PASS | Canonical tags properly configured |
| Robots.txt | ✓ PASS | Robots.txt is accessible and properly configured |
| Noindex on Key Pages | ✓ PASS | All important pages are indexable |
| H1 Tags | ▲ WARN | 0 pages missing H1, 3 with multiple H1s |
| Structured Data / Schema | ✓ PASS | 19 pages with valid structured data |
| Mobile Friendliness | ✓ PASS | Mobile-friendly configuration detected |
| XML Sitemap | ✓ PASS | XML sitemap accessible with 9 URLs |
| OG / Social Tags | ▲ WARN | 10 pages missing Open Graph tags |

### Technical Priority Analysis

✦ Odito AI Insight

Critical issues found: Security Headers. Address these immediately as they directly impact search visibility and user experience.

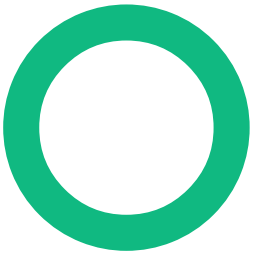
09

# Crawlability Analysis

Indexation status and crawl budget analysis

| 25 | 25 | 0 | 100% |
|---|---|---|---|
| Pages Crawled | Pages Indexed | Pages Blocked | Index Rate |
| Discovered | In Google | Noindex/robots | Indexed/Crawled |

## Crawl Status Distribution



- 25 indexed (100%)
- 0 blocked (0%)

All pages are successfully indexed and accessible to search engines.

## Blocked Pages Breakdown

| Reason | Affected | SEO Impact | Fix |
|---|---|---|---|
| Other | 8 | Medium | Review crawlability settings |

**Crawlability Insight**

✦ Odito AI Insight

Other affecting 8 pages should be prioritized. Review the blocked reasons above and implement fixes to improve indexation rate.

SECTION 03

# Performance Analysis

Core Web Vitals, Lighthouse and optimisation roadmap

## 10 Core Web Vitals

Desktop and mobile Lighthouse analysis

| 39 | 39 | 13.0s | 707ms |
|---|---|---|---|
| Desktop Score | Mobile Score | Mobile LCP | Mobile TBT |
| Lighthouse | Lighthouse | Target < 2.5s | Target < 200ms |

### Desktop vs Mobile Comparison

Desktop: 39/100

Mobile: 39/100

Good: ≥90 Fair: 50-89 Poor: <50

### Core Web Vitals — Detailed

| Metric | Desktop | Rating | Mobile | Rating | Priority |
|---|---|---|---|---|---|
| First Contentful Paint (FCP) | 1.9s | Needs Work | 9.5s | Poor | HIGH |
| Largest Contentful Paint (LCP) | 3.1s | Needs Work | 13.0s | Poor | HIGH |
| Total Blocking Time (TBT) | 630ms | Poor | 707ms | Poor | HIGH |
| Cumulative Layout Shift (CLS) | 0.15 | Needs Work | 0.00 | Good | LOW |
| Time to First Byte (TTFB) | 329ms | Good | 323ms | Good | LOW |

**Core Web Vitals SEO Impact**

✦ Odito AI Insight

Core Web Vitals require optimization. Mobile performance (39) and desktop performance (39) impact search visibility and user experience. LCP of 13.0s needs attention.

## 11 Performance Opportunities

Speed improvements and estimated savings

### Optimisation Opportunities

| Optimisation | Saving | Effort | Cumulative Impact | Priority |
|---|---|---|---|---|
| Eliminate render-blocking resources | 840ms | Medium | -840ms | HIGH |
| Remove unused JavaScript | 620ms | Medium | -1460ms | MEDIUM |
| Optimise and compress images | 480ms | Easy | -1940ms | MEDIUM |
| Enable text compression (gzip/br) | 320ms | Easy | -2260ms | LOW |
| Serve assets with efficient caching | 240ms | Easy | -2500ms | LOW |

### Performance Improvement Forecast

| | | | |
|---|---|---|---|
| Current | LCP: 3.2s | Score: 71/100 | Poor |
| After Images | LCP: 2.7s | Score: 78/100 | Fair |
| After JS fix | LCP: 2.1s | Score: 83/100 | Good |
| Full fix | LCP: 0.7s | Score: 91/100 | Excellent |

**Performance Optimisation Plan** ✦ Odito AI Insight

All optimisations deliver 2,500ms saving — moving Mobile LCP from 3.2s (Poor) to 0.7s (Excellent), Performance 71→91. Image compression and gzip are deployable in under an hour for an instant 800ms gain.

SECTION 04

# Keyword Analysis

Rankings, positions and near-page-1 opportunities

12

## Keyword Ranking Analysis

5 keywords tracked

| 5 | 0 | 5 | 0 |
|---|---|---|---|
| Total Keywords | Ranking Keywords | Not Ranking | Top 10 Rankings |
| tracked | of 5 | outside Top 100 | of 5 |

### ⚠️ Ranking Alert

None of the tracked keywords are ranking within the top 100 search results.

### Keyword Position Table

| Keyword | Rank | Status |
|---|---|---|
| IT serviced | — | Not Ranking |
| IT serviced services | — | Not Ranking |
| professional IT serviced | — | Not Ranking |
| local IT serviced | — | Not Ranking |
| best IT serviced | — | Not Ranking |

### Keyword Ranking Insights

✦ Odito AI Insight

None of your 5 tracked keywords are currently ranking in the top 100. Focus on technical SEO foundations, content optimization, and building authority to improve visibility.

## 13 Keyword Opportunity Analysis

Near page-1 keywords and ranking distribution

### Ranking Distribution

- Top 3 (2 keywords)
- Pos 4-10 (4 keywords)
- Pos 11-20 (3 keywords)
- Pos 21-30 (1 keywords)
- 30+ (0 keywords)

### Near Top-10 Opportunities

| Keyword | Volume | Position | Gap to #10 | Est. Additional Clicks |
|---|---|---|---|---|
| **seo audit software** | 4,400 | #11 | 1 positions | +120/mo |
| **technical seo checker** | 3,200 | #14 | 4 positions | +274/mo |
| **ai visibility seo** | 2,900 | #18 | 8 positions | +386/mo |
| **ai search optimization** | 1,800 | #24 | 14 positions | +315/mo |

**Keyword Distribution Insight**

✦ Odito AI Insight

Near-page-1 group represents 15,000+ additional impressions/month within 90 days. Targeted content improvements and authority building on 3 key pages can deliver this within the forecast window.

SECTION 05

# AI Visibility

GEO, AEO, AISEO — visibility across AI search platforms

05

14

## AI Visibility Overview

GEO · AEO · AISEO — AI search readiness

29

| 25 | 64 | 24 | 23 |
|---|---|---|---|
| **AI Readiness** | **GEO Score** | **AEO Score** | **Voice Intent** |
| /100 overall | Generative Engine Opt | Answer Engine Opt | Voice Search Ready |

| 17 | 24 |
|---|---|
| **AI Citation** | **AI Topical Authority** |
| Citation Probability | Topical Authority Score |

## Understanding AI Search Optimization

**GEO**

**Generative Engine Optimization**

Optimising content so AI models like ChatGPT and Gemini cite your pages when generating answers. Requires conversational structure, entity-rich writing, and direct answers in the first 60 words.

**AEO**

**Answer Engine Optimization**

Structuring content for direct answer extraction. FAQPage schema, Q&A formatting, and concise definitions are the primary signals for Perplexity and Google AI Overviews.

**AISEO**

**AI Search Engine Optimization**

The unified discipline covering AI-powered search visibility — traditional SEO signals combined with Knowledge Graph authority, entity coverage, and LLM indexability.

### AI Readiness Gap Analysis

✦ Odito AI Insight

Low AI visibility. Significant optimization needed for AI search readiness and entity recognition.

15

## LLM Visibility Analysis

Brand citation rates across AI platforms

| 12% | 43% | 31% | 4 |
|---|---|---|---|
| **Citation Rate** | **Industry Average** | **Gap to Close** | **Platforms** |
| across all LLMs | benchmark | vs benchmark | ChatGPT · Perplexity · Gemini · Claude |

### Citation Rate by Platform

ChatGPT 18%
Industry avg: 43% ■ 25% gap

Perplexity 12%
Industry avg: 43% ■ 31% gap

Gemini 24%
Industry avg: 43% ■ 19% gap

Claude 8%
Industry avg: 43% ■ 35% gap

### Citation Signal Analysis

| Citation Signal | Status | Impact on Rate | Fix |
|---|---|---|---|
| **Structured Data** | 34% coverage | +15-20% | Add JSON-LD to all pages |
| **Knowledge Graph** | Not Claimed | +8-12% | Claim via Google GBP |
| **FAQ Schema** | 0% coverage | +6-10% | Add FAQPage JSON-LD |
| **Topical Authority** | Partial | +4-8% | Create entity hub pages |
| **Conversational Content** | 31% score | +3-5% | Rewrite intros for GEO |

### LLM Citation Growth Forecast

✦ Odito AI Insight

Citation rate 12% vs industry avg 43%. Addressing schema, Knowledge Graph, and FAQ schema is projected to lift to 28-35% within 30 days — nearly a 3x improvement in AI-driven brand visibility.

16

# AI Content Readiness

Conversational content, FAQ and snippet optimization

## AI Content Signal Scores

### AI Content Strategy

✦ Odito AI Insight

Rewriting 10 key page intros to lead with a direct answer is estimated to increase AI snippet probability from 29% to 45-50% on those pages. AI models weight the first 60 words most heavily for answer extraction.

17

# Knowledge Graph & Entity Analysis

Brand entity presence and coverage

| Not Claimed | 3 | 4 | 1 |
|---|---|---|---|
| KG Status | Entities Linked | Entities Missing | Partial Coverage |
| Brand entity | of 8 | High priority | Need improvement |

## Entity Coverage Map

| Entity | Status | Pages | Action Required |
|---|---|---|---|
| SEO Audit | ✓ Linked | 3 | No action needed |
| Technical SEO | ✓ Linked | 5 | No action needed |
| Core Web Vitals | ✓ Linked | 2 | No action needed |
| E-E-A-T | ✗ Missing | 0 | Create hub page + schema |
| AI Overviews | ✗ Missing | 0 | Create hub page + schema |
| GEO | ✗ Missing | 0 | Create hub page + schema |
| Knowledge Graph | ■ Partial | 1 | Add schema + content |
| AEO | ✗ Missing | 0 | Create hub page + schema |

### What is a Knowledge Graph Entity?

Google's KG is a database of facts about real-world entities. A verified brand entity gives AI models an authoritative source of facts about your business.

### Impact Without a KG Entity

Without a KG anchor, AI models may fabricate or omit facts about your brand in generated answers.

### How to Claim Your Entity

Verify Google Business Profile → add Organization schema with sameAs to LinkedIn/Twitter/Crunchbase → ensure NAP consistency.

**Knowledge Graph Impact** ✦ Odito AI Insight

Claiming the KG entity adds +8 AI Readiness points and improves brand citation accuracy across ChatGPT, Gemini, and Perplexity. Without it, AI-generated answers about your brand may be inaccurate.

SECTION 06

# Action Plan & Forecast

30-day roadmap, growth projection and methodology

18

# AI Optimisation Recommendations

Prioritised actions to improve AI search visibility

## AI Action Plan

| # | Recommended Action | Expected Impact | Effort | Priority |
|---|---|---|---|---|
| 1 | Add JSON-LD schema to 47 pages | +15 pts | Medium | P1 |
| 2 | Claim Knowledge Graph entity | +8 pts | Hard | P2 |
| 3 | Add FAQPage schema to 31 Q&A pages | +6 pts | Easy | P3 |
| 4 | Rewrite 10 intros for conversational GEO | +5 pts | Medium | P4 |
| 5 | Create E-E-A-T and AI Overviews hub pages | +4 pts | Medium | P5 |
| 6 | Add Organization schema with sameAs links | +3 pts | Easy | P6 |

## Implementation Steps

1

### Add JSON-LD Schema to 47 Pages

Use Google's Structured Data Markup Helper to generate JSON-LD. Place in <head>. Validate with Rich Results Test. Article for blogs; WebPage + BreadcrumbList for landing pages.

2

### Claim Knowledge Graph Entity

Verify Google Business Profile → ensure consistent NAP → add Organization schema with sameAs links → submit Knowledge Panel claim.

3

### Add FAQPage Schema to 31 Pages

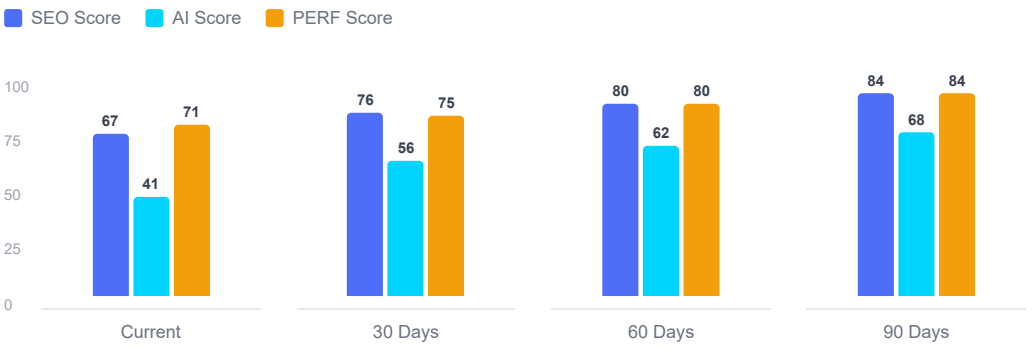
Wrap Q&A content in FAQPage JSON-LD. Each Question/Answer must match visible text exactly. Keep answers under 300 characters for optimal AI extraction.

19

# AI Growth Forecast

Projected score improvements over 90 days

## 90-Day Score Projection



SEO Health

AI Visibility

Performance

**After 90 days:**

SEO: 67 → 84

AI Vis: 41 → 68

Speed: 71 → 84

## Forecast Breakdown

| Milestone | SEO Health | AI Visibility | Performance | Overall |
|---|---|---|---|---|
| **Current** | 67 | 41 | 71 | 60 |
| **30 Days** | 76 | 56 | 75 | 69 |
| **60 Days** | 80 | 62 | 80 | 74 |
| **90 Days** | 84 | 68 | 84 | 79 |

### 90-Day Growth Projection

✦ Odito AI Insight

Executing the full recommended plan is projected to move overall grade from C+ (58) to B+ (79) within 90 days. AI Visibility gains +27 points — the most dramatic improvement — positioning the site to capture 15,000-25,000 additional monthly sessions.

## 20 30-Day Action Plan

Structured implementation roadmap

### Week 1 Technical Quick Wins — Days 1-7

- Remove noindex from 5 revenue pages (30 min)
- Fix 14 broken internal links (1 hour)
- Add FAQ schema to top 10 blog posts (2-3 hrs)
- Fix 18 missing meta descriptions on key pages

### Week 2 Schema Rollout — Days 8-14

- Add Article JSON-LD to all blog posts (1 day)
- Add WebPage schema to all landing pages
- Add Organization schema with sameAs links
- Validate all schema via Google Rich Results Test

### Week 3 Content Optimization — Days 15-21

- Rewrite 10 key page intros for GEO optimization
- Add ALT text to all 31 images
- Enable image compression (480ms saving)
- Enable gzip/br text compression (320ms saving)

### Week 4 AI Entity & Authority — Days 22-30

- Claim Google Knowledge Graph entity
- Create E-E-A-T hub page with Article schema
- Set up / verify Google Business Profile
- Begin mobile LCP optimization (target < 2.5s)

**30-Day Plan Impact Forecast** ✦ Odito AI Insight

Week 1 quick wins deliver +18 score points within 7 days. By end of Week 2 the schema rollout adds +15 AI Visibility points. The full 30-day plan targets overall score 76+, up from 58.

## 21 Audit Methodology

How Odito AI performs SEO and AI Visibility audits

Odito AI uses a multi-layer analysis engine combining traditional SEO crawling, AI entity detection, structured data validation, and LLM citation measurement to produce a 360-degree audit.

**1 Crawler Engine**

Distributed crawler scans up to 10,000 pages, extracting on-page signals, HTTP headers, redirects, canonical tags, robots directives, and structured data from every URL.

**2 AI Entity Detection**

Entity graph maps content against Google's Knowledge Graph and Wikidata, identifying covered, partially covered, and missing entities.

**3 Structured Data Validation**

All JSON-LD, Microdata, and RDFa validated against Schema.org specs and Google Rich Results requirements.

**4 LLM Citation Analysis**

Odito AI probes ChatGPT, Perplexity, Gemini, and Claude with domain-related queries to measure actual brand citation rate.

**5 Core Web Vitals**

PageSpeed Insights API data collected for all key pages on desktop and mobile, mapped against Good/Needs Work/Poor thresholds.

**6 Score Calculation**

Weighted model: Technical (25%), On-Page (25%), AI Visibility (30%), Performance (10%), Authority (10%).
