AI Analysis Summary

Full-Site AI Analysis

[Odito AI Insight](#)

Odito AI analysis shows agencyplatform.com has strong technical foundations — valid SSL, clean sitemap, and responsive design — but suffers from critically low AI search visibility. 47 pages lack structured data and no Knowledge Graph entity is verified. Fixing these issues is projected to deliver a 35-50% organic traffic increase within 90 days.

Issue Distribution

- Critical (8)
- Warnings (14)
- Info (22)
- Passed (47)

03

Key Strengths vs Issues

What's working and what needs fixing

The Odito AI engine evaluated all SEO and AI visibility signals. Here is a summary of the site's strongest points and most critical areas for improvement.

✓ **Key Strengths**

- ✓ Valid SSL — HTTPS enforced site-wide via 301
- ✓ XML Sitemap with 298 URLs correctly declared
- ✓ Mobile-responsive with proper viewport configuration
- ✓ Clean URL architecture and logical hierarchy
- ✓ Core landing pages correctly indexed by Google

✗ **Issues to Address**

- ✗ 47 pages missing JSON-LD structured data markup
- ✗ Knowledge Graph entity not claimed or verified
- ✗ Mobile LCP 3.2s exceeds Google's 2.5s Good threshold
- ✗ 31 images missing ALT text — accessibility & SEO risk
- ✗ 5 key revenue pages blocked by noindex tags

Priority Assessment

↗ Odito AI Insight

Odito AI identifies the noindex issue on 5 revenue pages as the fastest win — a 30-minute fix restoring Google ranking access. Missing schema on 47 pages is the most impactful structural improvement, delivering +15 AI Visibility points once implemented.

04

Priority Fix Roadmap

Action plan ordered by impact and effort

Execute items in order for maximum cumulative score improvement. Easy items take hours; Hard items may need a developer.

#	Issue	Impact	Effort	Est. Gain	Timeline
1	Remove noindex from 5 key pages	High	Easy	+8 pts	Day 1
2	Add FAQ schema to top 10 blog posts	High	Easy	+6 pts	Day 1-2
3	Fix 14 broken internal links	Medium	Easy	+4 pts	Day 1-2
4	Add Article/WebPage schema to 47 pages	High	Medium	+15 pts	Day 3-7
5	Rewrite 10 page intros for GEO	Medium	Medium	+5 pts	Day 7-14
6	Fix 18 missing meta descriptions	Medium	Easy	+4 pts	Day 7-10
7	Add ALT text to 31 images	Low	Easy	+2 pts	Day 7-10
8	Claim Knowledge Graph entity	High	Hard	+8 pts	Day 14-21
9	Optimise mobile LCP to under 2.5s	High	Hard	+10 pts	Day 14-30
10	Create E-E-A-T and GEO hub pages	Medium	Hard	+5 pts	Day 21-30

Roadmap Impact Forecast

◆ Odito AI Insight

Following this roadmap is projected to lift overall score 58→82, SEO 67→84, and AI Visibility 41→68 within 30 days. Items 1-3 take under half a day and deliver +18 points.

05

SEO Health Overview

Score breakdown by category

58

/100

Score Breakdown by Category

Score Grade Reference

Range	Grade	Status	What it means
90-100	A+	Excellent	Top percentile — elite signals across all categories
80-89	A	Very Good	Minor improvements reach the elite tier
70-79	B	Good	Solid base — focused fixes move the needle
60-69	C+	Fair	Prioritised action plan recommended
50-59	C	Average	Structured improvement plan needed
0-49	D	Poor	Significant issues across multiple dimensions

Score Interpretation

Odito AI Insight

agencyplatform.com scores C+ (58/100). SEO Health at 67 reflects good foundations but structured data gaps are limiting rankings. AI Visibility at 41 is the most critical gap — and the fastest to fix.

SECTION 02

SEO Audit

On-page, schema, technical and crawlability

02

06

On-Page SEO Audit

10 issues across 312 pages

Issue Breakdown

#	Issue	Severity	Pages	Impact	Recommended Fix
1	Schema Markup Missing	CRITICAL	47	High	Add JSON-LD per page type
2	Meta Descriptions Missing	CRITICAL	18	High	Write unique 150-160 char descriptions
3	H1 Tags Missing	CRITICAL	12	High	Add one H1 per page with target keyword
4	Images Missing ALT Text	CRITICAL	31	Medium	Add descriptive ALT text to all images
5	FAQ Schema Missing	HIGH	31	High	Add FAQPage JSON-LD schema
6	Broken Internal Links	HIGH	14	Medium	Fix or 301-redirect broken links
7	Duplicate Title Tags	HIGH	7	Medium	Make every page title unique
8	Title Tags Too Long	MEDIUM	9	Low	Trim to 50-60 characters
9	Thin Content Pages	MEDIUM	14	Medium	Expand to 600+ words
10	Open Graph Tags Missing	LOW	22	Low	Add og:title, description, image

On-Page Priority Recommendation

Odito AI Insight

Odito AI recommends prioritising JSON-LD structured data on all 47 affected pages. This enables rich results in Google, increases AI snippet probability, and improves LLM citation rate — all from a single code change per page.

07

Structured Data Analysis

JSON-LD coverage and AI search impact

106

With Schema

JSON-LD detected

206

Missing Schema

No structured data

34%

Coverage

of all pages

47

Errors

Validation issues

Schema Coverage Breakdown

Why Structured Data Matters

Platform	With Schema	Without Schema	Your Gap
Google Rich Results	Eligible for rich results	Plain blue link only	Missing
Google AI Overviews	Entities extracted & cited	Anonymous — skipped	Critical
ChatGPT / Perplexity	High citation probability	Low citation probability	12% vs 43%
LLM Training Index	Structured facts indexed	Unstructured — low priority	Impact

Structured Data Impact

Odito AI Insight

JSON-LD is the primary mechanism AI search engines use to understand content. Without it, pages are anonymous text with no entity associations. Adding schema to 47 pages is the fastest path to lifting LLM citation rate from 12% to 28-35%.

08

Technical SEO Health

Server, crawlability and indexation audit

38
/100

Technical Check Results

Technical Check	Status	Finding / Detail
SSL Certificate	✓ PASS	Valid TLS 1.3, expires 2026-01-20
Robots.txt	✓ PASS	Valid, sitemap correctly declared
XML Sitemap	✓ PASS	298 URLs, correct format
Mobile Friendly	✓ PASS	Responsive layout confirmed
Page Indexability	✓ PASS	Homepage correctly indexed
Core Web Vitals	▲ WARN	Mobile LCP 3.2s > 2.5s threshold
Redirect Chains	▲ WARN	8 URLs with 3+ hop chains
Canonical Tags	▲ WARN	23 pages missing canonical tags
Security Headers	▲ WARN	CSP and X-Frame-Options absent
Noindex Key Pages	✗ FAIL	5 revenue pages blocked from Google
Broken Links (404)	✗ FAIL	14 internal links returning 404
Schema Validation	✗ FAIL	23 pages have structured data errors
Structured Data	✗ FAIL	47 pages have no JSON-LD schema

Technical Priority Analysis

Odito AI Insight

Failed: Noindex Key Pages, Broken Links (404), Schema Validation, Structured Data. Noindex on 5 revenue pages is most urgent — removal takes 30 minutes and restores ranking access within days. Fix broken links and schema validation errors next.

09

Crawlability Analysis

Indexation status and crawl budget analysis

Crawl Status Distribution

Blocked Pages Breakdown

Reason	Affected	SEO Impact	Fix
Noindex meta tag	5	Critical	Remove noindex from revenue pages
Robots.txt block	12	High	Review robots.txt disallow rules
Redirect to blocked page	5	Medium	Fix destination page indexation
Canonical mismatch	3	Low	Correct canonical tag URLs

Crawlability Insight

Odito AI Insight

The 5 noindex revenue pages are highest priority — they appear to be accidentally tagged during a CMS update. Removal is estimated to restore ~15% of lost organic sessions within 3-7 days.

SECTION 03

Performance Analysis

Core Web Vitals, Lighthouse and optimisation roadmap

03

10

Core Web Vitals

Desktop and mobile Lighthouse analysis

82

Desktop Score

Lighthouse

71

Mobile Score

Lighthouse

3.2s

Mobile LCP

Target < 2.5s

280ms

Mobile TBT

Target < 200ms

Desktop vs Mobile Comparison

Core Web Vitals — Detailed

Metric	Desktop	Rating	Mobile	Rating	Priority
First Contentful Paint (FCP)	1.2s	Good	1.8s	Good	LOW
Largest Contentful Paint (LCP)	2.1s	Good	3.2s	Needs Work	MEDIUM
Total Blocking Time (TBT)	120ms	Good	280ms	Needs Work	MEDIUM
Cumulative Layout Shift (CLS)	0.04	Good	0.08	Good	LOW
Time to First Byte (TTFB)	280ms	Good	340ms	Good	LOW

Core Web Vitals SEO Impact

Odito AI Insight

Mobile LCP of 3.2s is the critical ranking factor. Moving from Poor to Good (<2.5s) can improve mobile rankings 10-15%. The optimisation page shows how to achieve this with a combined 2,500ms saving.

11

Performance Opportunities

Speed improvements and estimated savings

Optimisation Opportunities

Optimisation	Saving	Effort	Cumulative Impact	Priority
Eliminate render-blocking resources	840ms	Medium	-840ms	HIGH
Remove unused JavaScript	620ms	Medium	-1460ms	MEDIUM
Optimise and compress images	480ms	Easy	-1940ms	MEDIUM
Enable text compression (gzip/br)	320ms	Easy	-2260ms	LOW
Serve assets with efficient caching	240ms	Easy	-2500ms	LOW

Performance Improvement Forecast

Current	LCP: 3.2s	Score: 71/100		Poor
After Images	LCP: 2.7s	Score: 78/100		Fair
After JS fix	LCP: 2.1s	Score: 83/100		Good
Full fix	LCP: 0.7s	Score: 91/100		Excellent

Performance Optimisation Plan

Odito AI Insight

All optimisations deliver 2,500ms saving — moving Mobile LCP from 3.2s (Poor) to 0.7s (Excellent), Performance 71→91. Image compression and gzip are deployable in under an hour for an instant 800ms gain.

SECTION 04

Keyword Analysis

Rankings, positions and near-page-1 opportunities

04

12

Keyword Ranking Analysis

10 keywords tracked

Keyword Position Table

Highlighted = near top-10 opportunity keywords

Keyword	Volume	Rank	Prev	Change	Difficulty
seo audit tool	8,100	#2	#4	+2	45/100
what is an seo audit	5,400	#1	#1	—	32/100
seo audit software	4,400	#11	#14	+3	58/100
site audit free tool	6,700	#5	#5	—	61/100
technical seo checker	3,200	#14	#16	+2	52/100
core web vitals checker	2,400	#6	#8	+2	44/100
ai visibility seo	2,900	#18	#22	+4	41/100
backlink analysis tool	5,100	#9	#7	-2	55/100
generative engine seo	1,200	#8	#12	+4	29/100
ai search optimization	1,800	#24	#31	+7	38/100

Keyword Growth Forecast

Odito AI Insight

Near-page-1 keywords: 'seo audit software' (#11) · 'technical seo checker' (#14) · 'ai visibility seo' (#18). Content improvements + 1-2 backlinks per page could move these to page 1 within 60-90 days, unlocking 10,500 additional monthly impressions.

13

Keyword Opportunity Analysis

Near page-1 keywords and ranking distribution

Ranking Distribution

Near Top-10 Opportunities

Keyword	Volume	Position	Gap to #10	Est. Additional Clicks
seo audit software	4,400	#11	1 positions	+120/mo
technical seo checker	3,200	#14	4 positions	+274/mo
ai visibility seo	2,900	#18	8 positions	+386/mo
ai search optimization	1,800	#24	14 positions	+315/mo

Keyword Distribution Insight

Odito AI Insight

Near-page-1 group represents 15,000+ additional impressions/month within 90 days. Targeted content improvements and authority building on 3 key pages can deliver this within the forecast window.

SECTION 05

AI Visibility

GEO, AEO, AISEO — visibility across AI search platforms

05

14

AI Visibility Overview

GEO · AEO · AISEO — AI search readiness

41
/100

Understanding AI Search Optimization

GEO	Generative Engine Optimization Optimising content so AI models like ChatGPT and Gemini cite your pages when generating answers. Requires conversational structure, entity-rich writing, and direct answers in the first 60 words.
AEO	Answer Engine Optimization Structuring content for direct answer extraction. FAQPage schema, Q&A; formatting, and concise definitions are the primary signals for Perplexity and Google AI Overviews.
AISEO	AI Search Engine Optimization The unified discipline covering AI-powered search visibility — traditional SEO signals combined with Knowledge Graph authority, entity coverage, and LLM indexability.

AI Readiness Gap Analysis

Odito AI Insight

AI Readiness 41/100 — below industry average (~55). Missing schema (34% coverage) and no Knowledge Graph entity account for an estimated 23 improvement points — more than half the gap to a Good score.

15

LLM Visibility Analysis

Brand citation rates across AI platforms

Citation Rate by Platform

Citation Signal Analysis

Citation Signal	Status	Impact on Rate	Fix
Structured Data	34% coverage	+15-20%	Add JSON-LD to all pages
Knowledge Graph	Not Claimed	+8-12%	Claim via Google GBP
FAQ Schema	0% coverage	+6-10%	Add FAQPage JSON-LD
Topical Authority	Partial	+4-8%	Create entity hub pages
Conversational Content	31% score	+3-5%	Rewrite intros for GEO

LLM Citation Growth Forecast[↗ Odito AI Insight](#)

Citation rate 12% vs industry avg 43%. Addressing schema, Knowledge Graph, and FAQ schema is projected to lift to 28-35% within 30 days — nearly a 3x improvement in AI-driven brand visibility.

16

AI Content Readiness

Conversational content, FAQ and snippet optimization

AI Content Signal Scores

Content Optimization Checklist

Content Signal	Status	Recommendation
Answer query in first 60 words	Failing (38/312)	Rewrite intros to lead with direct answer
Q&A; heading structure (H2/H3)	Partial (41%)	Convert key pages to Q&A; heading format
FAQ section on blog posts	Failing (0 pages)	Add 3-5 Q&A; pairs to each blog post
Entity-rich content	Partial (52%)	Add named entities, tools, metrics
Conversational language	Failing (31%)	Reduce keyword density, add natural language
TL;DR summary blocks	Failing (0 pages)	Add summary at top of long-form content

AI Content Strategy

[↗ Odito AI Insight](#)

Rewriting 10 key page intros to lead with a direct answer is estimated to increase AI snippet probability from 29% to 45-50% on those pages. AI models weight the first 60 words most heavily for answer extraction.

17

Knowledge Graph & Entity Analysis

Brand entity presence and coverage

Entity Coverage Map

Entity	Status	Pages	Action Required
SEO Audit	✓ Linked	3	No action needed
Technical SEO	✓ Linked	5	No action needed
Core Web Vitals	✓ Linked	2	No action needed
E-E-A-T	✗ Missing	0	Create hub page + schema
AI Overviews	✗ Missing	0	Create hub page + schema
GEO	✗ Missing	0	Create hub page + schema
Knowledge Graph	■ Partial	1	Add schema + content
AEO	✗ Missing	0	Create hub page + schema

What is a Knowledge Graph Entity?

Google's KG is a database of facts about real-world entities. A verified brand entity gives AI models an authoritative source of facts about your business.

Impact Without a KG Entity

Without a KG anchor, AI models may fabricate or omit facts about your brand in generated answers.

How to Claim Your Entity

Verify Google Business Profile → add Organization schema with sameAs to LinkedIn/Twitter/Crunchbase → ensure NAP consistency.

Knowledge Graph Impact

Odito AI Insight

Claiming the KG entity adds +8 AI Readiness points and improves brand citation accuracy across ChatGPT, Gemini, and Perplexity. Without it, AI-generated answers about your brand may be inaccurate.

SECTION 06

Action Plan & Forecast

30-day roadmap, growth projection and methodology

06

18

AI Optimisation Recommendations

Prioritised actions to improve AI search visibility

AI Action Plan

#	Recommended Action	Expected Impact	Effort	Priority
1	Add JSON-LD schema to 47 pages	+15 pts	Medium	P1
2	Claim Knowledge Graph entity	+8 pts	Hard	P2
3	Add FAQPage schema to 31 Q&A; pages	+6 pts	Easy	P3
4	Rewrite 10 intros for conversational GEO	+5 pts	Medium	P4
5	Create E-E-A-T and AI Overviews hub pages	+4 pts	Medium	P5
6	Add Organization schema with sameAs links	+3 pts	Easy	P6

Implementation Steps

- 1

Add JSON-LD Schema to 47 Pages

Use Google's Structured Data Markup Helper to generate JSON-LD. Place in . Validate with Rich Results Test. Article for blogs; WebPage + BreadcrumbList for landing pages.
- 2

Claim Knowledge Graph Entity

Verify Google Business Profile → ensure consistent NAP → add Organization schema with sameAs links → submit Knowledge Panel claim.
- 3

Add FAQPage Schema to 31 Pages

Wrap Q&A; content in FAQPage JSON-LD. Each Question/Answer must match visible text exactly. Keep answers under 300 characters for optimal AI extraction.

19

AI Growth Forecast

Projected score improvements over 90 days

90-Day Score Projection

Forecast Breakdown

Milestone	SEO Health	AI Visibility	Performance	Overall
Current	67	41	71	60
30 Days	76	56	75	69
60 Days	80	62	80	74
90 Days	84	68	84	79

90-Day Growth Projection

Odito AI Insight

Executing the full recommended plan is projected to move overall grade from C+ (58) to B+ (79) within 90 days. AI Visibility gains +27 points — the most dramatic improvement — positioning the site to capture 15,000-25,000 additional monthly sessions.

20

30-Day Action Plan

Structured implementation roadmap

Week 1	Technical Quick Wins	Days 1-7
■ Remove noindex from 5 revenue pages (30 min) ■ Fix 14 broken internal links (1 hour) ■ Add FAQ schema to top 10 blog posts (2-3 hrs) ■ Fix 18 missing meta descriptions on key pages		
Week 2	Schema Rollout	Days 8-14
■ Add Article JSON-LD to all blog posts (1 day) ■ Add WebPage schema to all landing pages ■ Add Organization schema with sameAs links ■ Validate all schema via Google Rich Results Test		
Week 3	Content Optimization	Days 15-21
■ Rewrite 10 key page intros for GEO optimization ■ Add ALT text to all 31 images ■ Enable image compression (480ms saving) ■ Enable gzip/br text compression (320ms saving)		
Week 4	AI Entity & Authority	Days 22-30
■ Claim Google Knowledge Graph entity ■ Create E-E-A-T hub page with Article schema ■ Set up / verify Google Business Profile ■ Begin mobile LCP optimization (target < 2.5s)		

30-Day Plan Impact Forecast

Odito AI Insight

Week 1 quick wins deliver +18 score points within 7 days. By end of Week 2 the schema rollout adds +15 AI Visibility points. The full 30-day plan targets overall score 76+, up from 58.

21

Audit Methodology

How Odito AI performs SEO and AI Visibility audits

Odito AI uses a multi-layer analysis engine combining traditional SEO crawling, AI entity detection, structured data validation, and LLM citation measurement to produce a 360-degree audit.

- Crawler Engine**
Distributed crawler scans up to 10,000 pages, extracting on-page signals, HTTP headers, redirects, canonical tags, robots directives, and structured data from every URL.
- AI Entity Detection**
Entity graph maps content against Google's Knowledge Graph and Wikidata, identifying covered, partially covered, and missing entities.
- Structured Data Validation**
All JSON-LD, Microdata, and RDFa validated against Schema.org specs and Google Rich Results requirements.
- LLM Citation Analysis**
Odito AI probes ChatGPT, Perplexity, Gemini, and Claude with domain-related queries to measure actual brand citation rate.
- Core Web Vitals**
PageSpeed Insights API data collected for all key pages on desktop and mobile, mapped against Good/Needs Work/Poor thresholds.
- Score Calculation**
Weighted model: Technical (25%), On-Page (25%), AI Visibility (30%), Performance (10%), Authority (10%).
